sity; Associates of applied Science, Medical
Technology, W.C.C.

My Vision: I have a compelling vision to make a
difference in the world. My vision is to change
the world by touching lives. My mission in life is
to constantly help others innately create excel-
lence in their health and life. I know that I am
fulfilling my mission as I endeavor to positively
touch the lives of everybody I come in contact
with, helping to secure a healthy future for gen-
erations to come.

My mission as an educator is to promote health
to the public, the media, and legislators and to
others. I hold a special place in my heart for the
importance of family health. I know that the
strength of our future is dependent on the health
and quality of life of our children. My wife, Terri,
and my children, Timothy, Emily and Christopher
are supporters of my vision.
